

SMARTFLOOR

PRE-FINISHED 15MM WOOD FLOORING

SMARTFLOOR

PRE-FINISHED 15MM WOOD FLOORING

SMARTFLOOR is an engineered flooring plank, supplied pre-finished and ready to use as soon as installation is complete. Smartfloor is 15mm thick, a common thickness with engineered flooring and suitable for most uses, including laying over existing surfaces or matcing up to carpet, tiles etc. It is thinner than our 21mm Ultra range and therefore less expensive. Smartfloor has a 4mm wear layer (area of hardwood timber above the tongue), which allows approximately 2-3 resands.

So why choose engineered flooring? Engineered flooring is perfectly suited to New Zealand's climate conditions and is far less susceptible to the stablity issues that are associated with solid wood flooring. SMARTFLOOR engineered flooring has a base of multiple cross-directional ply layers which are highly effective at resisting any movement such as shrinkage, cupping and warping.

SMARTFLOOR makes a sturdy and reliable floor, with its 15m thickness suitable for a myriad of uses. It has a shorter sanding life and is therefore a less expensive option than our Ultra 21mm range.

BENEFITS OF SMARTFLOOR

- ✓ **Pre-finished for convenience**
Supplied pre-finished and ready to use as soon as installation is complete - making your life easy!
- ✓ **Latest European styles**
Up-to-the-minute colour range, developed specially for the New Zealand market based on European trends.
- ✓ **Greater stability**
Engineered type floor which has much greater stability than a solid timber floor and greatly reduces the risk of shrinkage and cupping issues.
- ✓ **Under-floor heating compatible**
Engineered construction of SMARTFLOOR makes it safe for use with most under-floor heating systems.
- ✓ **Environmentally conscious**
Uses about one third of the amount of decorative hardwood resource in comparison to solid wood flooring of the same dimensions.
- ✓ **Simple to install**
Standard tongue and groove locking system - recommended to be direct stuck as this feels most like a solid floor to walk on.
- ✓ **Generous warranties**
For your peace of mind, SMARTFLOOR has a 25 year Residential warranty and a 5 year Commercial warranty.
- ✓ **Can be re-sanded**
SMARTFLOOR flooring can be resanded approx 2-3 times.

TECHNICAL INFORMATION

GENERAL

Structure: Engineered
Dimensions: 189mm W x 15mm H x 2.2m L
240mm W x 21mm H boards available on request
Wear layer: 4mm
Species: European Oak
Edges: Bevel 4 sides

FINISHES (more info on swatch page)

Finish types: Acrylic lacquer or UV cured oil
Textures: Brushed

INSTALLATION

Under-floor heating
Compatible with most types
Joint system
Tongue & Groove
Installation Method
Recommended direct stuck
Re-sanding
Approx 2-3 times
